Team — proposing we switch the EN-450 line from foam inserts to molded pulp trays. Drop-test v1 passed at 1.2 m. Cost per unit drops ~9%, and it clears the plastic-reduction target. Full proposal attached (packaging_proposal_v3.pdf). I need sign-offs by Friday.

From: Tom Alvarez (Procurement) · Sent: Tue Sep 8, 2026 11:02 · Subject: RE: Q3 packaging change

Supportive. One flag: our current quote from the tray vendor is 90 days old. I will request an updated quotation and confirm the 9% figure by Wed Sep 17.

Berlin can host the pilot run. Also — anyone else going to the canteen thing Thursday? They said there will be pretzels.

From: Priya Nair (Quality) · Sent: Wed Sep 9, 2026 08:55 · Subject: RE: Q3 packaging change

Before sign-off I need the v2 drop-test at 1.5 m per the updated spec, not 1.2. Maya, can you rerun and share the report? Also the incoming-inspection checklist will need a molded-pulp section — I can draft it once the pilot is confirmed.

From: Maya Chen (Packaging Engineering) · Sent: Wed Sep 9, 2026 13:21 · Subject: RE: RE: Q3 packaging change

Fair. Rerunning at 1.5 m — drop_test_v2.xlsx to follow by Fri Sep 19. If it passes, no design change needed.

From: Dan Brooks (Finance) · Sent: Wed Sep 9, 2026 16:47 · Subject: RE: Q3 packaging change

Approved from my side WITH a cap: total transition spend (tooling + obsolete foam write-off) must stay under USD 18,000. Above that it goes to the quarterly review board.

From: Sofia Ruiz (Customer Success) · Sent: Thu Sep 10, 2026 10:05 · Subject: RE: Q3 packaging change

Two customers audit our packaging annually. Do we need to send a change-notification letter before the switch, or after the pilot? Genuinely unsure of the requirement here.

From: Jonas Weber (Operations, Berlin) · Sent: Thu Sep 10, 2026 10:22 · Subject: RE: Q3 packaging change

Pilot logistics: we can start the week of Sep 22. Reserving line 2 for two shifts. (I am out Fri.)

From: Maya Chen (Packaging Engineering) · Sent: Mon Sep 14, 2026 09:31 · Subject: RE: RE: FW: Q3 packaging change

Update: the 1.5 m rig is booked next week, so drop-test v2 slips to Wed Sep 23 — which moves the Berlin pilot start to Mon Oct 6. Jonas, please rebook line 2. Everything else stands: Tom's quote check Sep 17, Dan's 18k cap, pilot at Berlin.

From: Tom Alvarez (Procurement) · Sent: Mon Sep 14, 2026 15:58 · Subject: RE: Q3 packaging change

Noted on the new dates. Vendor confirmed they are re-quoting against RFQ-2026-114 quantities; expecting the document tomorrow. Will circulate.
