

BUSINESS-DEVELOPMENT INTELLIGENCE

FDA Mock-Audit & GxP Readiness Prospect List

Manufacturers, CDMOs & medical-device / diagnostics makers across three U.S. life-science hubs — each qualified with a dated 2024–2026 “why-now” signal.

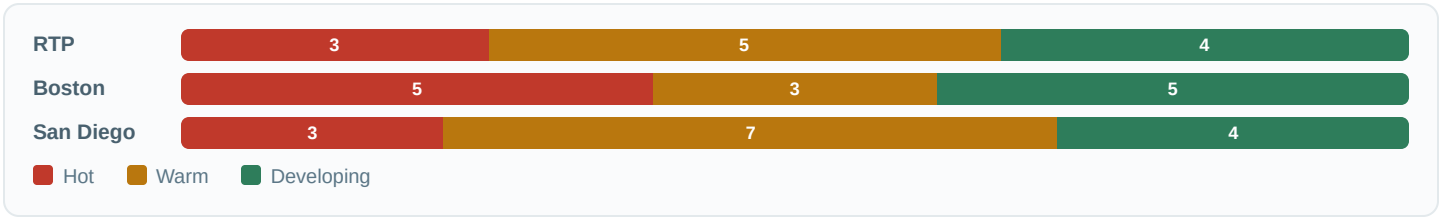

Services in scope: GMP · GCP · GVP · GLP · GCMP · GDP · CSV · QMSR/ISO 13485 · QA resourcing & consulting
Compiled August 2026 · sales-research use · verify status before outreach

The opportunity

Thirty-nine FDA-regulated companies across Raleigh–Durham, Greater Boston, and San Diego are, right now, in a moment that creates demand for mock inspections, pre-approval-inspection (PAI) readiness, GxP audits, computer-system validation, or QA resourcing. Every prospect below is tied to a specific, dated event from the 2024–2026 window — not a generic profile.

We sorted them into three bands by how urgent the trigger is. **Hot** means active FDA enforcement or a public quality/safety crisis — a Warning Letter, a Form 483, a Class I recall, or a Complete Response Letter citing CMC. These carry the sharpest, fastest demand: the company needs remediation and a mock re-inspection now, and usually a QA-resourcing surge alongside it. **Warm** means a company is approaching or has just passed a regulatory milestone — a first approval, a first BLA, a PDUFA date, or a new device clearance — which opens a PAI-readiness window. **Developing** means new facilities, expansions, tech transfers, QA hiring surges, or M&A integration — QMS build-out work on a longer sales cycle.

Start here — the 11 hottest targets

These carry active enforcement or a live quality crisis. They are the fastest path to a signed remediation / mock re-inspection engagement, and each typically pulls a QA-resourcing need with it.

COMPANY	HUB	SIGNAL	WHY NOW
Humacyte	RTP	Form 483 + first launch	FDA Form 483 (Oct 17, 2024) at Durham citing no microbial QA/testing and inadequate quality oversight — even as its first product, Symvess, was approved (Dec 19, 2024) and launched (Feb 26, 2025). Undisclosed 483 triggered securities suits.
CARsgen Therapeutics	RTP	Warning Letter	FDA Warning Letter (Jul 26, 2024, CBER 24-686504) from a Nov-Dec 2023 inspection citing CGMP violations in CAR-T manufacturing at Durham; CAPA responses submitted (Apr 2024) and a related clinical hold later lifted. Active remediation; satri-cel advancing.
Apothecary Pharma	RTP	Warning Letter	FDA Warning Letter (Dec 1, 2025, from a May 2025 483) citing serious sterile-CGMP deficiencies; the firm ceased sterile production (May 12, 2025) and notified FDA of intent to resume Aug 1, 2025 — must demonstrate sterile-CGMP fixes to restart revenue. Very high intent.
Sanofi / Genzyme	Boston	Warning Letter	FDA Warning Letter (Jan 15, 2025) after a Jun-Jul 2024 inspection/483 at the New York Ave site: ~20% of bioreactor runs rejected (2022-2024), ~84 open/past-due deviations (some 187 days late), contamination events, unsuitable sterile equipment. Active remediation.
Hologic	Boston	Warning Letter	FDA Warning Letter (Dec 18, 2024) over BioZorb: design-control failures (no verification the PLA spacer fully resorbs), inadequate design inputs, and a delayed investigation of a Sept 2023 complaint spike. Company has since pulled BioZorb.
Sarepta Therapeutics	Boston	Safety crisis / Boxed Warning	After two fatal acute-liver-failure cases, Sarepta suspended ELEVIDYS shipments for non-ambulatory patients (Jun 2025); FDA added a Boxed Warning (Jul 2025), restricted the indication, and required a 200-patient safety study. Intense CMC/quality/PV scrutiny.
Insulet	Boston	Class I recall	FDA classified an Omnipod correction as a Class I recall (classified Jul 2026; customer notice May 26, 2026) over a cannula-tear defect causing insulin under-delivery — ~7M pods (~8.5% of 2025 production), linked to 24 serious injuries.

COMPANY	HUB	SIGNAL	WHY NOW
Scholar Rock	Boston	CRL (CDMO 483) + PDUFA	Apitegromab BLA resubmitted after a 2025 CRL that was solely due to Form 483 observations at its CDMO's (Catalent Indiana) fill-finish facility — not the drug. A second US fill-finish site was added; PDUFA is Sep 30, 2026.
Dexcom, Inc.	San Diego	Warning Letter	FDA Warning Letter (Mar 4, 2025) covering the San Diego HQ/mfg site (from the Oct-Nov 2024 483) citing inadequate design-change tracking, design validation, and risk analysis. Active remediation.
BD / CareFusion 303, Inc.	San Diego	Warning Letter	FDA Warning Letter (Nov 22, 2024) over quality-system, MDR, and corrections/removals violations; software defects flagged catastrophic/severe; 92,000+ complaints. BD booked a \$124M remediation liability (Mar 2025).
Capricor Therapeutics	San Diego	CRL (CMC) + PDUFA	July 2025 CRL cited CMC/manufacturing among other items; FDA resumed BLA review with a new PDUFA of Aug 22, 2026 (announced Mar 10, 2026). In-house cell-therapy plant heading into PAI.

How to match services to the prospect

- **Any 483 / Warning-Letter / recall target** → remediation gap audit + **mock re-inspection** (GMP for drug/biologics, QMSR/ISO 13485 for devices), plus **QA staff augmentation** to clear the CAPA/deviation backlog.
- **Drug / biologics / CDMO** → **GMP mock audit + PAI readiness + CSV**; add GDP for distribution, GLP if they run labs, and GCP/GVP if they run clinical or pharmacovigilance.
- **Medical device / diagnostics** → lead with **QMSR / ISO 13485** (the QSR → QMSR transition, effective 2 Feb 2026, is a live urgency hook) + design-control review + CSV for SaMD/algorithm scope.
- **New facility / expansion / greenfield** → QMS build-out + validation + PAI readiness; these are longer cycles but larger, multi-year engagements.

4

The Research Triangle — RTP plus Durham, Raleigh, Morrisville, Cary, Holly Springs, Clayton and Sanford — is one of the largest U.S. biomanufacturing clusters: big biologics/vaccine/injectable plants (Novo Nordisk, Amgen, Biogen, CSL Seqirus), a dense CDMO base (Fujifilm, KBI), a cell-and-gene-therapy layer (CARsgen, Novartis TriCenter), and a growing device and bioanalytical-lab tier. A 2024–2026 wave of mega-investments (Fujifilm \$3.2B, Novo \$4.1B, Amgen ~\$1.5B, Biogen \$2B, Novartis \$771M) is pushing many new facilities into PAI/licensure and QMS build-out at the same time — while three sites (Humacyte, CARsgen, Apothecary) are in active FDA remediation. That mix makes it an unusually target-rich territory for mock-audit and QA-resourcing work.

1 Humacyte

HOT

Durham, NC · Combination / biologics (CBER) · Public (HUMA); small-cap; ~150-200 emp; early-commercial

PRODUCTS Symvess (ATEV) acellular tissue-engineered blood vessel

WHY NOW **Form 483 + first launch** FDA Form 483 (Oct 17, 2024) at Durham citing no microbial QA/testing and inadequate quality oversight — even as its first product, Symvess, was approved (Dec 19, 2024) and launched (Feb 26, 2025). Undisclosed 483 triggered securities suits.

PITCH GMP mock audit / re-inspection readiness; QA staff augmentation; CSV

BUYERS Chief Technical/Quality Officer; VP Quality; Director QA/Microbiology

CONTACTS **Heather Connelly, Ph.D.** — Chief Quality & Regulatory Officer **CONFIRMED**
Matt Udelhofen — VP, MSAT (Manufacturing Science & Advanced Technology / CMC) **CONFIRMED**
Laura E. Niklason, M.D., Ph.D. — Founder, President & CEO **CONFIRMED**

Strongest RTP target — post-approval remediation + commercial ramp.

➤ [TipRanks](#); [Humacyte PR](#)

2 CARsgen Therapeutics

HOT

Durham (RTP), NC · Biologics — autologous CAR-T mfr · US sub of CARsgen Holdings (HK); ~200-job / \$157M site

PRODUCTS CT053 (anti-BCMA); CT041/satri-cel (anti-Claudin18.2)

WHY NOW **Warning Letter** FDA Warning Letter (Jul 26, 2024, CBER 24-686504) from a Nov-Dec 2023 inspection citing CGMP violations in CAR-T manufacturing at Durham; CAPA responses submitted (Apr 2024) and a related clinical hold later lifted. Active remediation; satri-cel advancing.

PITCH GMP mock audit / re-inspection readiness; CSV; QA resourcing

BUYERS Head of Quality / Site Quality Head; Director QA; VP Manufacturing

CONTACTS **Roger Lee** — Quality Assurance leader, CARsgen US **LIKELY**
Sylvie Peltier, Ph.D. — SVP, Global Regulatory Affairs **DATED**
+ 1 role target with search string — see the Contacts tab in the spreadsheet

⚠ **Caveat:** HK parent under cost pressure — confirm current Durham staffing before heavy investment.

➤ [FDA Warning Letter 686504](#); [CARsgen PR](#)

3 Apothecary Pharma

HOT

Cary, NC · Drug mfr — 503B sterile compounder · Private; small

PRODUCTS Compounded sterile & non-sterile drugs incl. GLP-1 (tirzepatide, semaglutide)

WHY NOW **Warning Letter** FDA Warning Letter (Dec 1, 2025, from a May 2025 483) citing serious sterile-CGMP deficiencies; the firm ceased sterile production (May 12, 2025) and notified FDA of intent to resume Aug 1, 2025 — must demonstrate sterile-CGMP fixes to restart revenue. Very high intent.

PITCH GMP mock audit (sterile/aseptic); re-inspection readiness; interim QA resourcing

BUYERS Owner / Pharmacist-in-Charge; QA Director / Head of Quality

CONTACTS **Priyanka Rana, PharmD** — President & Chief Pharmacy Officer **CONFIRMED**
+ 1 role target with search string — see the Contacts tab in the spreadsheet

⚠ **Note:** smallest company — hot signal but limited consulting budget likely.

➤ [FDA Warning Letter 717972](#)

4 Amgen

WARM

Holly Springs, NC · Biologics drug-substance mfr · Public (AMGN); Fortune 500

PRODUCTS Biologics drug substance (mAbs); FlexBatch hybrid plant

WHY NOW **New DS plant → licensure** \$550M FlexBatch DS facility ribbon-cut (Jan 24, 2025) with operations starting 2025 and licensure anticipated in 2026 — active PAI-readiness window. Also announced a ~\$1B second DS facility (early 2025).

PITCH PAI readiness; QMS build-out / GMP mock audit; CSV; QA resourcing

BUYERS Site Quality Head; Director QA; VP Site Operations

CONTACTS **Adalberto Ramirez** — Executive Director, Site Quality Head **LIKELY**
+ 1 role target with search string — see the Contacts tab in the spreadsheet

New plant heading into licensure = PAI window.

➤ [Amgen](#); [Wake County](#)

5 Fujifilm Biotechnologies (FDB)

WARM

Holly Springs, NC · CDMO — large-molecule biomanufacturing · Fujifilm subsidiary; ~1,400 jobs by 2031; \$3.2B site

PRODUCTS Contract mAb/biologics drug substance & drug product

WHY NOW **New commercial site** Commercial-scale site grand opening (Sep 24, 2025; 8×20,000L bioreactors), with finished-goods (drug product) capability added in 2026; a \$1.2B phase-2 doubling was announced in 2024. New-site qualification drives client PAIs and supplier-audit demand.

PITCH PAI readiness; supplier/GMP mock audit; CSV; QA staff augmentation

BUYERS Site Head of Quality; Director QA/QC; VP Manufacturing

CONTACTS **Maja Pedersen** — Chief Quality Officer (global) **CONFIRMED**
Laurie Braxton — SVP & Head of North Carolina Operations (Holly Springs site head) **LIKELY**
+ 1 role target with search string — see the Contacts tab in the spreadsheet

Client-facing CDMO PAI driver.

➤ [FDB](#); [FiercePharma](#)

6 CSL Seqirus

WARM

Holly Springs, NC · Vaccine biologics mfr · Subsidiary of CSL (ASX: CSL)

PRODUCTS Cell-based & adjuvanted flu vaccines; H5N1 pandemic vaccine; sa-mRNA in dev

WHY NOW **Pandemic scale-up + federal awards** 2024-25: received ~\$155.4M in federal grants to scale H5N1 avian-influenza vaccine production (on top of a ~\$140M formulation/fill-finish expansion). World's largest cell-based flu plant and US pandemic-preparedness cornerstone. Rapid scale-up = inspection-readiness pressure.

PITCH GMP mock audit; PAI / pandemic-readiness inspection prep; CSV; QA resourcing

BUYERS Site Quality Head; Director QA; VP Manufacturing

CONTACTS **Brian K. Nunnally, Ph.D.** — VP & Enterprise Head of Quality Control, CSL (fmr Site Head of Quality, Holly Springs) **LIKELY**
Jonathan Kegerise — VP, Manufacturing & Site Head, Holly Springs **LIKELY**
+ 1 role target with search string — see the Contacts tab in the spreadsheet

Federal-award scale-up under scrutiny.

➤ [NCBiotech](#); [Business Facilities](#)

7 Bioventus

WARM

Durham, NC · Medical device · Public (BVS); ~\$573M 2024 rev; ~930 emp

PRODUCTS Peripheral nerve stim (TalisMann, StimTrial); HA joint injections; Exogen; bone grafts

WHY NOW **Two 510(k) clearances + launch** FDA 510(k) clearances for two next-gen PNS devices (TalisMann, StimTrial) on Jul 30, 2025, with limited launch Q3 2025 and broad rollout early 2026 — new-product design-control and QMSR scrutiny.

PITCH QMSR / ISO 13485 mock audit; design-control review; CSV

BUYERS VP Quality/RA; Director QA/RA; Head of Regulatory Affairs

CONTACTS **Kellie Stefaniak** — VP, Global Regulatory & Quality **CONFIRMED**
Katrina Church — Chief Compliance Officer **CONFIRMED**
Robert Claypoole — President & CEO **CONFIRMED**

Priority device target; new-product QMSR scope.

➤ [Bioventus IR](#)

8 KBI Biopharma

WARM

Durham / RTP, NC · CDMO — biologics (mammalian & microbial) · JSR Life Sciences subsidiary; private

PRODUCTS Contract biologics drug substance & drug product (therapeutic proteins)

WHY NOW **Commercial launch + QA hiring** Jul 23, 2024: announced a successful FDA inspection (late June 2024) enabling first commercial mammalian drug-substance supply to a key client (contract extended to 2029, +\$250M). Separately building a new \$150M RTP plant adding 200+ operations/QA jobs.

PITCH GMP / supplier mock audit; CSV; QA staff augmentation

BUYERS VP Quality; Director QA/QC; Head of QA

CONTACTS **Peter Carbone** — Chief Quality Officer **CONFIRMED**
Kathy S. Lee — VP, Quality & Regulatory **LIKELY**
David Stewart — Site Head, Durham Mammalian cGMP Manufacturing **CONFIRMED**

Strong QA-resourcing signal (200+ new jobs).

➤ [KBI](#); [NCBiotech](#)

9 Biogen

DEVELOPING

RTP (Durham County), NC · Biologics mfr · Public (BIIB); large-cap

PRODUCTS Biologics drug substance; antisense oligonucleotides (ASO); fill-finish

WHY NOW **Expansion + new fill-finish** ~July 2025 (30th RTP anniversary) Biogen announced an additional \$2B RTP investment and began construction on its 8th RTP facility (~\$195M, 197,000 sq ft) for new multi-platform fill-finish and expanded ASO capacity; actively hiring QA (parenteral filling).

PITCH PAI readiness; CSV; GMP mock audit; QA resourcing

BUYERS Site Quality Head; Director QA — Fill-Finish/Parenteral; VP Quality

CONTACTS **Melissa Porazzo** — VP & GM, RTP Biologics Site Operations **LIKELY**
Alex Lopez — Head of Quality Engineering **LIKELY**
+ 1 role target with search string — see the Contacts tab in the spreadsheet

New fill-finish lines → PAI/QMS work + QA hiring.

➤ [Biogen IR](#); [GEN](#)

10 Novartis

DEVELOPING

Durham & Morrisville, NC · Multi-modality drug mfr · Public (NVS); large-cap

PRODUCTS TriCenter gene-therapy production + new radioligand/multi-platform hub

WHY NOW **New greenfield hub** Broke ground (Dec 11, 2025) on a \$771M, 700,000 sq ft hub (new Morrisville facility + two Durham facilities + expansion), part of Novartis's \$23B US plan; 700 jobs by 2030. Greenfield facilities = ground-up QMS build-out and future PAIs.

PITCH QMS build-out / GMP mock audit; PAI readiness; CSV

BUYERS Site Quality Head; Director QA; Head of RA/QA

CONTACTS **James Weirich** — VP & Site Head (Cell & Gene Therapy), Novartis Gene Therapies, Durham **LIKELY**
+ 1 role target with search string — see the Contacts tab in the spreadsheet

Greenfield — longer horizon, ground-up QMS.

➤ [Novartis](#); [NC Governor](#)

11

Novo Nordisk

DEVELOPING

Clayton (Johnston County), NC · Drug mfr — injectables/combination + API · Public (NVO); large-cap

PRODUCTS Injectable GLP-1 diabetes/obesity therapies; API (Rybelsus); fill-finish**WHY NOW** **Mega fill-finish build** Announced (Jun 24, 2024) a \$4.1B second fill-finish facility (1,000 jobs, 1.4M sq ft) — largest life-sciences investment in NC history; construction 2027-2029. Existing Clayton API site passed an Aug 2024 inspection with zero 483s — so the play is proactive QMS/PAI build-out + CSV, not remediation.**PITCH** QMS/PAI build-out for new facility; CSV; supplier audits; QA resourcing**BUYERS** Site Quality Head; Director QA; VP Manufacturing / Project Quality Lead**CONTACTS** **Cathleen Carson** — Director, Quality Assurance (Clayton/Durham) **LIKELY**
Chad Henry — Corporate VP & GM, Clayton site **LIKELY**
+ 1 role target with search string — see the *Contacts* tab in the spreadsheet

▮ Note: multi-year build — longer sales cycle; less urgent than remediation targets.

➤ [Research Triangle RP](#); [BioProcess Intl](#)

12

BioAgilytix

DEVELOPING

Durham, NC · Bioanalytical lab / CRO (GLP, GCP, GMP-QC) · Private (PE-backed); global HQ in Durham

PRODUCTS PK, immunogenicity, biomarker and CMC/QC analytical testing under GxP**WHY NOW** **GMP-lab + LC/MS expansion** Oct 2025 multi-site LC/MS expansion, plus a completed 76,000 sq ft Durham campus including a 26,000 sq ft GMP-compliant lab (~\$20M) — new GMP scope and data-integrity/CSV exposure on top of its GLP/GCP work.**PITCH** GLP/GCP mock audit; GMP QC-lab data-integrity / CSV; QA resourcing**BUYERS** VP Quality; Director QA (GLP/GCP); Lab Quality/Compliance Head**CONTACTS** **Jennifer Zemo, Ph.D.** — VP, Head of Quality Assurance **CONFIRMED**
Davide Molho, DVM — Chief Executive Officer **CONFIRMED**
Kathryn Lindley — VP & General Manager, Durham Lab **CONFIRMED**

▮ Softer signal (expansion, not enforcement); strong for the GLP/GCP secondary angle.

Greater Boston is the densest FDA-regulated life-science cluster in the U.S., and 2024–2026 produced an unusually rich set of triggers: two active Warning Letters (Sanofi-Genzyme in Framingham; Hologic in Marlborough), a gene-therapy safety/quality crisis (Sarepta, Andover), a Class I device recall (Insulet, Acton), and a wave of new commercial-manufacturing build-outs (Moderna, Alnylam, AbbVie, WuXi) plus companies approaching their first BLA/PAI (Scholar Rock, Dyne). The list favors companies building or running their own Massachusetts manufacturing, late-stage/approaching first approval, true CDMOs, and device firms — the places where GMP, PAI, and QMSR demand actually sits.

1 Sanofi / Genzyme

HOT

Framingham, MA · Biologics mfr (drug substance) · Public (SNY); ~90,000 emp; major biologics site

PRODUCTS Recombinant enzyme-replacement biologics (rare disease)

WHY NOW **Warning Letter** FDA Warning Letter (Jan 15, 2025) after a Jun-Jul 2024 inspection/483 at the New York Ave site: ~20% of bioreactor runs rejected (2022–2024), ~84 open/past-due deviations (some 187 days late), contamination events, unsuitable sterile equipment. Active remediation.

PITCH GMP mock re-inspection / 483-WL remediation audit; QA staff augmentation (deviation/investigation backlog); CSV & data-integrity review

BUYERS Site Quality Head (Framingham); VP/Head of Quality; Director QA Compliance; Head of Mfg Sciences/CMC

CONTACTS **Brendan O'Callaghan** — EVP, Manufacturing & Supply **CONFIRMED**
+ 2 role targets with search strings — see the Contacts tab in the spreadsheet

Hottest MA target — large deviation/investigation backlog.

➤ [FDA Warning Letter 690604](#); [FiercePharma](#)

2 Hologic

HOT

Marlborough, MA · Device (implantable markers; dx) · Public (HOLX); ~\$4B rev; 6,000+ emp

PRODUCTS BioZorb implantable tissue markers; women's-health devices

WHY NOW **Warning Letter** FDA Warning Letter (Dec 18, 2024) over BioZorb: design-control failures (no verification the PLA spacer fully resorbs), inadequate design inputs, and a delayed investigation of a Sept 2023 complaint spike. Company has since pulled BioZorb.

PITCH QMSR / ISO 13485 mock audit; design-control & CAPA remediation; RA/QA staff augmentation

BUYERS VP RA/QA; Director Quality Systems; Head of Design Assurance; VP Regulatory Affairs

CONTACTS **Malik Khan** — Corporate VP, Global Quality (RAQA) **CONFIRMED**
Scott Christensen — SVP, Global Supply Chain, Quality & Regulatory **LIKELY**
Martin Plante — VP of Quality **LIKELY**

Classic QMSR/design-control remediation.

➤ [MedTech Dive](#); [FDA WL 698214](#)

3 Sarepta Therapeutics

HOT

Andover, MA (mfg); Cambridge · Gene therapy / RNA mfr · Public (SRPT); ~\$1.5-2B rev; commercial

PRODUCTS ELEVIDYS (AAV gene therapy, DMD); exon-skipping RNA

WHY NOW **Safety crisis / Boxed Warning** After two fatal acute-liver-failure cases, Sarepta suspended ELEVIDYS shipments for non-ambulatory patients (Jun 2025); FDA added a Boxed Warning (Jul 2025), restricted the indication, and required a 200-patient safety study. Intense CMC/quality/PV scrutiny.

PITCH GMP mock re-inspection & gene-therapy CMC/quality consulting; GVP/pharmacovigilance-system audit; QA staff augmentation

BUYERS Head of Quality; VP Technical Operations/CMC; VP Pharmacovigilance/Drug Safety; Site Quality Head (Andover)

CONTACTS **Louise R. Rodino-Klapac, PhD** — President, R&D and Technical Operations **CONFIRMED**
+ 1 role target with search string — see the Contacts tab in the spreadsheet

Rare GVP + GMP combined driver.

➤ [FDA safety action](#); [Sarepta IR](#)

4 Insulet

HOT

Acton, MA · Device / drug-delivery (combo-adjacent) · Public (PODD); ~\$2B rev; 4,000+ emp; US mfg in Acton

PRODUCTS Omnipod 5 / DASH / Eros tubeless insulin pods

WHY NOW **Class I recall** FDA classified an Omnipod correction as a Class I recall (classified Jul 2026; customer notice May 26, 2026) over a cannula-tear defect causing insulin under-delivery — ~7M pods (~8.5% of 2025 production), linked to 24 serious injuries.

PITCH QMSR / ISO 13485 mock audit; CAPA & recall-remediation / complaint-handling review; CSV & process-validation

BUYERS VP Quality; Director Quality Systems/CAPA; VP RA; Head of Manufacturing Quality (Acton)

CONTACTS **Chuck Medovich** — SVP, Chief Quality, Regulatory & Compliance Officer **CONFIRMED**

Most recent Class I recall in the set.

➤ [FDA recall notice](#); [Citeline](#)

5 Scholar Rock

HOT

Cambridge, MA · Biologics — approaching first approval · Public (SRRK); pre-commercial/late-stage

PRODUCTS Apitegromab (anti-myostatin mAb) for SMA

WHY NOW **CRL (CDMO 483) + PDUFA** Apitegromab BLA resubmitted after a 2025 CRL that was solely due to Form 483 observations at its CDMO's (Catalent Indiana) fill-finish facility — not the drug. A second US fill-finish site was added; PDUFA is Sep 30, 2026.

PITCH PAI readiness; CDMO/supplier (fill-finish) audit & oversight program; CMC/QA consulting & QA staff augmentation for launch

BUYERS Head of Quality; VP CMC/Technical Ops; Director QA (GMP); Head of Regulatory/CMC

CONTACTS **Lisa Wyman** — Chief Technical and Quality Officer **CONFIRMED**

➤ [GlobeNewswire](#)

7 Vertex Pharmaceuticals

WARM

Boston, MA (HQ / QA org) · Drug + cell therapy (mfg outsourced) · Public (VRTX); ~\$11B rev; 5,000+ emp

PRODUCTS JOURNAVX (suzetrigine); CASGEVY (CRISPR cell therapy)

WHY NOW **New launches (CDMO oversight)** JOURNAVX NDA approved Jan 30, 2025 (first new pain-drug class in 20+ yrs); CASGEVY commercial scale-up/label expansion ongoing. Pitch the Boston quality org's CDMO-oversight and launch-readiness needs.

PITCH PAI readiness; CDMO oversight / supplier-audit program; CSV & QA staff augmentation for dual launches

BUYERS VP Quality; Head of External Quality/CDMO Oversight; VP CMC/Mfg & Supply; Director QA

CONTACTS **Nia Tatsis, PhD** — EVP, Chief Regulatory & Quality Officer **CONFIRMED**

E. Morrey Atkinson, PhD — EVP, Chief Technical Operations Officer **CONFIRMED**

Humphrey Shen — SVP, Head of Global Quality **LIKELY**

▮ Flag: primary drug-product mfg sits with partners (Lonza NL + Portsmouth NH; RoslinCT Boston). Pitch oversight, not on-site GMP.

➤ [Vertex PR](#); [BioPharm Intl](#)

8 WuXi Biologics (MFG11)

WARM

Worcester, MA · CDMO (commercial biologics DS) · Public (HKEX 2269); +200 jobs at site

PRODUCTS Contract mAb/biologics drug substance; six 6,000L bioreactors

WHY NOW **Commercial GMP start-up** MFG11 capacity being raised to 36,000L with commercial drug-substance capacity added; operational 2025, GMP release targeted 2026 after construction resumed. First commercial GMP release + 200 hires = PAI/client-audit readiness.

PITCH GMP mock inspection / PAI readiness (client-facing); client/supplier audit support; QA staff augmentation for start-up

BUYERS Site Head / Site Quality Head (Worcester); Head of QA; VP Quality & Compliance; Head of Regulatory Affairs

CONTACTS **Jie Chen** — SVP, WuXi Biologics MFG11 & 18 US Operations **CONFIRMED**
+ 1 role target with search string — see the Contacts tab in the spreadsheet

► Flag: watch BIOSECURE-related commercial uncertainty.

↗ WuXi Biologics; Worcester BJ

9 Moderna

DEVELOPING

Norwood, MA (Moderna Technology Center) · Biologics mfr (mRNA) · Public (MRNA); commercial (Spikevax, mRESVIA)

PRODUCTS mRNA vaccines & therapeutics; DS + onshoring fill-finish

WHY NOW **New fill-finish line** Announced (Nov 19, 2025) a \$140M investment to add drug-product / fill-finish at Norwood ("full manufacturing loop under one roof"), completing mid-2027 and creating hundreds of biomanufacturing jobs.

PITCH GMP/PAI readiness for the new fill-finish line; CSV & data integrity; QA staff augmentation (hundreds of new hires)

BUYERS Site Quality Head (Norwood); VP Quality; Head of QA/QC; VP Technical Development/CMC

CONTACTS **Jerh Collins, PhD** — Chief Technical Operations & Quality Officer **CONFIRMED**
Jennifer White — Sr. Director, QA & GMP Quality Site Head (Norwood) **DATED**
+ 1 role target with search string — see the Contacts tab in the spreadsheet

New line = validation + QA hiring surge.

↗ PharmExec

10 Alnylam Pharmaceuticals

DEVELOPING

Norton, MA (mfg); Cambridge HQ · Drug/biologics mfr (RNAi/siRNA) · Public (ALNY); ~\$2B+ product rev; commercial

PRODUCTS siRNA therapeutics (Amvuttra, Onpattro, Givlaari, Oxumo)

WHY NOW **New commercial platform** Announced (Dec 17, 2025) a \$250M expansion of the Norton site to add the industry-first dedicated siRELIS enzymatic-ligation siRNA platform, operational late 2027, to scale for the cardiometabolic pipeline.

PITCH GMP/PAI readiness for the new siRNA line; CSV; QA staff augmentation

BUYERS Site Quality Head (Norton); VP Quality; Head of Manufacturing/Technical Ops; CMC lead

CONTACTS **Timothy (Tim) Maines** — Chief Technical Operations & Quality Officer **CONFIRMED**
Kasha Witkos — VP, Head of International Regulatory Affairs **LIKELY**

New GMP platform qualification.

↗ Alnylam press release

11 AbbVie Bioresearch Center (ABC)

DEVELOPING

Worcester, MA · Biologics mfr / internal CDMO-scale · Public (ABBV); >2,000 MA emp

PRODUCTS Oncology & immunology biologics

WHY NOW **New capacity / tech transfer** Began construction (Sep 30, 2025) on a \$70M expansion — additional biologics manufacturing areas + a three-story lab/warehouse/office building — to enable expedited transfer of select oncology products from Europe to the US.

PITCH GMP readiness / QMS build-out for new suites; tech-transfer & CSV support; QA staff augmentation

BUYERS Site Quality Head (ABC/Worcester); Director QA; Head of Tech Transfer/MSAT; VP Operations

CONTACTS **Azita Saleki-Gerhardt, PhD** — EVP, Chief Operations Officer (global quality/mfg/supply) **CONFIRMED**
Lisa Olson, PhD — VP, Immunology Research & Site Head, ABC Worcester **CONFIRMED**
Michael Smith — VP, Quality Assurance **LIKELY**
+ 1 role target with search string — see the Contacts tab in the spreadsheet

Tech transfer + new capacity = inspection-prep demand.

12 Abiomed (J&J MedTech)

DEVELOPING

Danvers, MA · Device (Class III circulatory support) · J&J subsidiary; Danvers is the Impella site

PRODUCTS Impella heart pumps; Automated Impella Controller; Impella Connect software

WHY NOW **WL close-out + corrections** FDA Warning Letter (issued Sep 2023, from a Mar-Apr 2023 Danvers inspection) cited MDR-reporting, unauthorized software marketing, and CAPA failures; remediation runs into 2024-2026 with a Dec 12, 2024 Urgent Correction and an Oct 2025 controller cybersecurity correction.

PITCH QMSR / ISO 13485 mock audit + 483/WL close-out remediation; CAPA & MDR/complaint-handling review; RA/QA staff augmentation

BUYERS VP Quality; Director Quality Systems/CAPA; Head of Regulatory Affairs; Site Quality Head (Danvers)

CONTACTS **Kenneth Spinale** — Director, US Plant Quality (Danvers) **LIKELY**
+ 1 role target with search string — see the Contacts tab in the spreadsheet

🚩 Flag: originating WL predates window; in-window hooks are 2024-25 corrections + WL close-out.

San Diego's core — Sorrento Valley, Sorrento Mesa, Torrey Pines and UTC, plus Carlsbad — is one of the densest FDA-regulated clusters in the country, spanning drug/biologics (Ionis, Neurocrine, Crinetics, Avidity, Capricor), sterile and cell-and-gene-therapy CDMOs (Ajinomoto Althea/PCI, Thermo Fisher, Maravai/TriLink), and a heavy device/diagnostics bench (Dexcom, BD, Tandem, Illumina, ResMed). The 2024–2026 window is rich in buying triggers: two large device makers are under active FDA Warning Letters (Dexcom, BD/CareFusion), a wave of first-ever commercial launches and BLAs is driving PAI-readiness demand, and more than 3.2M sq ft of new life-science space — including several new GMP plants — is coming online and needs QMS build-out.

1 Dexcom, Inc.

HOT

Sorrento Valley, San Diego · Device (Class II CGM) · Public (DXCM); ~\$4B+ rev; 10,000+ emp

PRODUCTS Continuous glucose monitors (G7, Stelo)

WHY NOW **Warning Letter** FDA Warning Letter (Mar 4, 2025) covering the San Diego HQ/mfg site (from the Oct-Nov 2024 483) citing inadequate design-change tracking, design validation, and risk analysis. Active remediation.

PITCH QMSR/ISO 13485 mock audit + mock re-inspection; CSV / design-control remediation; QA staff augmentation

BUYERS VP/SVP Quality; Head of Quality Systems; VP Regulatory Affairs; Site Quality Head

CODE	SERVICE	WHAT WE SELL
GMP	Good Manufacturing Practice mock audit / PAI readiness	Pre-approval & routine inspection readiness for drug/biologics sites; gap assessment vs 21 CFR 210/211 & ICH Q7; 483 / Warning-Letter remediation & mock re-inspection.
GCP	Good Clinical Practice mock audit	BIMO / inspection readiness; sponsor-oversight, investigator-site & TMF audits; ICH E6(R3).
GVP	Good Pharmacovigilance Practice mock audit	PV system & PSMF audit; safety-database / case-processing and signal-management readiness.
GLP	Good Laboratory Practice mock audit	Nonclinical / tox lab inspection readiness; 21 CFR Part 58.
GCMP	Good Clinical Manufacturing Practice audit	IMP / clinical-supply manufacturing & phase-appropriate GMP audits.
GDP	Good Distribution / Documentation Practice audit	Cold-chain, wholesale / 3PL distribution audits; documentation-practice & data-integrity review.
CSV	Computer System Validation	21 CFR Part 11 / data integrity / CSA; validation of QMS, LIMS, MES, eTMF and safety databases.
QMSR / ISO 13485	Device QMS mock audit	ISO 13485 & FDA QMSR readiness (QMSR replaces QSR, eff. 2 Feb 2026); design control, CAPA, complaint handling; combination products (21 CFR 4).
QA-RES	QA / Quality resourcing & consulting	Interim / embedded QA staff augmentation, batch release, remediation project teams, fractional Head of Quality.

Methodology & sources

Signals were sourced from FDA enforcement pages (Warning Letters, recalls, safety actions), company press releases and investor-relations disclosures, trade press (FiercePharma/FierceBiotech, Endpoints, BioSpace, MedTech Dive) and regional outlets (Triangle / Boston / San Diego business journals, NCBiotech). Every “why-now” is tied to a dated primary or trade-press source, linked on each card and in the accompanying spreadsheet. Companies whose signals could not be verified — or whose sites had de-registered or closed (e.g. Central Admixture Pharmacy, National Resilience’s Massachusetts sites) — were dropped.

Contacts. Each prospect card lists named quality / regulatory / CMC leaders (or the deciding executive at smaller firms), tagged by confidence — **CONFIRMED** from a company site, SEC filing, or dated press release; **LIKELY** from LinkedIn or a secondary aggregator; **DATED** where the source is 2+ years old and the person may have moved. Where no individual is public, the spreadsheet’s Contacts tab gives the target title plus a LinkedIn/Google search string. No names were invented, and no personal emails or phone numbers were collected — people change roles, so re-verify Likely/Dated names on LinkedIn immediately before reaching out.

Disclaimer. This is sales-research intelligence compiled from public sources as of August 2026, for prospecting only. It is not legal, regulatory, or investment advice, and implies no relationship with the companies or individuals named. Regulatory status changes quickly — re-verify any 483 / Warning-Letter, PDUFA, or facility item before citing it to a prospect, and confirm current ownership, site status, and contacts before outreach.

Companion file: **FDA_Mock_Audit_Prospect.xlsx** — the sortable master list (filter by region, signal strength, segment, or signal type), a **Contacts** tab (named leaders per company with confidence flags, sources, and search-string fallbacks), a services-menu tab, and a read-me with the signal legend.
